First Name Last Name Date of Birth NHS Number	ALLERGIES/ADVERSE REACTIONS

PATIENT SPECIFIC DIRECTION (AUTHORITY TO ADMINISTER)

SUBCUTANEOUS SYRINGE PUMP (CSCI) (Blank Form) v.08.2023

ADVICE TO PRESCRIBERS:

This form should only be completed by a prescriber if CSCI treatment is needed immediately or likely within the next week.

It is best practice to prescribe a specific dose unless a dose range is considered appropriate. Ensure previously prescribed doses are crossed off before re-prescribing to avoid errors

ADVICE TO NURSES: ONLY ADMINISTER MEDICINE IF SYMPTOMS PRESENT.

If it is more than 1 week from date prescribed (see below) the community nurse will contact a prescriber to discuss the prescribed doses prior to first administration.

If a dose range is prescribed, start at lowest dose in the range.

If continued prescribing is required onto another form the NURSE should contact a prescriber for a WHOLE new page and cross through the old page to ensure there is no confusion with current dose.
